The CAM Test Prep, by Corporate Aviation Solutions, is an online learning management system that consists of a comprehensive database of “educational questions” which serves as both a study guide and practice exam. The CAM Test Prep simulates the actual test by presenting you with 200 multiple-choice questions that strategically cover the volumes of material that could possibly be presented. You are a busy professional, and to consider reading the enormous set of reference materials that the CAM exam is based on can be completely overwhelming. The CAM Test Prep is designed to focus on the topics that are statistically more likely to be presented on the actual exam. The CAM Test Prep has helped many people attain their objective – “Certified Aviation Manager” in an effective and time-efficient way.
